ACME, ALBERTA, THURSDAY OCTOBER 20th, 1955 \$1.50 a Year; 5c a Copy

Mr. and Mrs. Norman Nash were visitors at Banff for a couple of days.

Mrs. Frank Ginther (nee Lois McAlpine) of Drumheller and Mrs. Hesselgrave of Irricana were visitors at the home of Mrs. E. MacAlpine.

Don't forget the Annual Remembrance Ball Nov. 10. Watch for posters.

Donald Martin of Rocky Mt. House spent a few days with his parents, Mr. and Mrs. E. J. Martin at Carstairs. Donald left for work again on Monday.

Mr. and Mrs. Pickerill and children of Regina were weekend visitors at the home of Mr. and Mrs. Norman Nash.

RATS! RATS!

Yes, one has been seen by Mrs. Gordon McCracken which has been taken care of. Anyone seeing one and not doing their duty to exterminate or report them will be liable to a fine of not less than \$25.00 if not reported to Eli Spry, J.P., Pest Control Officer, Carbon.

CARD OF THANKS

I wish to thank all my friends neighbors and Old Timers for flowers, cards and visits during my recent stay in hospital.

Dave Anderson.

Mrs. Henry Sautter, Mrs. William Sautter and Mrs. Ed Martin of Carstairs attended the song festival at the Carbon Baptist Church on Sunday P.M., then later stopped at the home of Mr. and Mrs. C. Harsch for coffee. Thanks again, Mrs. Harsch, it was good.

Mr. and Mrs. Jack Adams were weekend visitors at Carbon.

The 4-H Club achievement Day was held at Beiseker Memorial Hall Oct. 20th. Taking part were the Acme, Carbon and Beiseker Clubs. Chairman Gilbert Schmaltz opened the meeting with a few words of welcome, and called on District Agriculturist S. W. Pettem, who expressed his pleasure of the interest shown by the clubs and especially commented on the excellent thematic displays of each club. Each display represented the progress of farming from 1905 to 1955, the Golden Jubilee year of our Province.

The chairman then called on Mr. G. R. Stirling, Provincial Supervisor of Soil Conservation and Weed Control who judged the samples. He congratulated the members for their splendid showing this year and the interest shown by new members.

Awards by points were as follows:

ACME CLUB

1. Virginia Zutter.
2. Ed Singer.
3. Lloyd Penner.

BEISEKER CLUB

1. Wayne Fisher.
2. Gilbert Schmaltz.
3. Gerald Berreth.

CARBON CLUB

1. Jerry Leiske.
2. Wayne Ohlhauser.
3. Morley Buyer.

Mr. Norman J. Bell, Field Service Representative of the Alberta Wheat Pool was the next speaker and spoke very highly of the three thematic displays, but also pointed out their shortcomings on the different points of the rules.

In the plot competition, Miss Virginia Zutter of Acme came first, Lawrence Schmaltz of Beiseker second and Larry Hecktor of Carbon came third, and Mr. Bell presented each winner with a prize.

The display judging was done by three judges with Carbon

placing first, Acme second and Beiseker third.

God Save the Queen brought a very interesting and instructive afternoon to a close.

The Club Leaders, Art Berreth, Beiseker; Murray Brown and Del Bates, assistant, Acme and Leo Halstead, Carbon deserve much credit for their work

FALL TREATMENT OF CANADA THISTLE AND PERENNIAL SOW THISTLE

These two weeds are an ever increasing problem on farms in Western Canada. Fall application of selective chemicals in combination with cultivation is valuable in bringing these weeds

under control. Fall spraying with either 2,4-D or M.C.P. following the removal of the crop at rates of 8 to 12 ozs. of acid equivalent. The land should then be left undisturbed for a period of two to three weeks, following which it should be cultivated in the usual manner.

In many cases there are only small patches and these should receive attention before the patches spread to the whole field.

SUB-OFFICE DATES

Report major surgical advance

A British surgeon reported recently a "major surgical advance" in a low blood pressure operating technique. It involves lowering a patient's blood pressure by 50 percent to reduce bleeding to a minimum during an operation, says an Associated Press report from Atlantic City.

The lessened bleeding, Sir Archibald McIndoe said, gives a surgeon "clarity of vision in difficult inaccessible regions so that the operation is more exact, more quickly performed and thereby more successful."

McIndoe's report was based on the results of using the technique with more than 4,500 patients at Queen Victoria Hospital, England, during a period of four years.

The technique involves two major steps. The patient is given a drug called pentolinum tartrate to reduce his blood pressure from the normal range of 120-140 to about 60, the part of the body to be operated on is elevated above the heart. That also helps lower blood pressure in the area of surgery.

Fashions

For Half-sizes

4629 14½-24½
by Anne Adams

Especially for the shorter, fuller figure—this slimming step-in accented by a new and dramatic collar detail. Picture this in crepe, faille, or cotton—you'll gather compliments galore wherever you go! Proportioned to fit—you won't have a single alteration worry!

Pattern 4629: Half Sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ takes 4 yards 39-inch fabric. This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome loose plate discomfort. PASTETH, an improved powder, sprinkled on upper and lower plates holds them firmer so that they feel more comfortable. No gummy, gooey, pasty taste or feeling. It's alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get PASTETH today at any drug counter.

MACDONALD'S BRIER

Canada's Standard Smoke

Many Canadian children still not immunized says doctor

TORONTO.—"For many years, protection against small-pox, tetanus, diphtheria, and whooping cough has been available to every Canadian child, but when we examine records, it is quite apparent that we are not taking full advantage of the benefits afforded by immunization," states Dr. C. S. Anglin, staff physician for the Hospital for Sick Children, in an article written specially for Health Magazine, official publication of the Health League of Canada.

He said that while these diseases should be matters of historic interest only in our country, over 200 persons die unnecessarily from them each year in Canada, while many times this number suffer a severe illness often accompanied by serious complications resulting in permanent disability.

Dr. Anglin pointed out that of all the infectious diseases of childhood, whooping cough causes by far the worst ravages in Europe and North America, according to the World Health Organization. In the years 1940-48, whooping cough killed three times as many children as measles, mumps, small-pox, scarlet fever, diphtheria, polio and meningitis combined. The last available statistics for Canada show that there are over 9,000 cases of whooping cough a year reported in Canada each year, and nearly 150 deaths a year from this disease.

"In an analysis of the cases of whooping cough seen at the Hospital for Sick Children, Toronto, during the past year, 85 percent of the children with whooping

cough had received no immunization. This is a sad commentary of the interest shown by some Toronto parents," he said.

Dr. Anglin wrote this article to draw attention to the importance of immunizing against these diseases, the goal of Canada's 13th National Immunization Week.

Tough goose

It may not be the "granddaddy" of them all but the goose shot recently by Calvin Hayes of the Lonebutte, Alta., district was certainly a patriarch of some description and eligible for the goose's hall of fame. The Canada grey weighed exactly 14 pounds. Added to this particular gander's fame was that he was wearing a metal band from the Fish and Wildlife Service, Washington, D.C. Calvin has forwarded the band to the Washington office and expects to get information as to when and where the goose was banded. To complete the story, Mrs. Hayes, mother of Calvin who cooked the goose stated that he was "tougher than shoe-leather".

Today is yesterday's pupil.

NEW G.O.C.—Major-Gen. William Jemmett McGill, D.S.O., C.D., 48, has been appointed general officer commanding Prairie Command with headquarters in Winnipeg. He succeeds Major-Gen. N. E. Rodgers who becomes vice-chief of the general staff. Gen. McGill's last appointment was as military advisor on the truce in Indo-China and he will assume his new position Nov. 22. Born in Ottawa, Gen. McGill enlisted in the Royal Canadian Corps of Signals at the age of 16. During the Second World War he served in a series of senior appointments in England and Northwest Europe and in 1944 was named commander of the 5th Infantry Brigade.

Frozen north wilderness may blossom

The Russians are considering building a mammoth dam across the Bering Strait and warming the Arctic Ocean with Pacific water pumped across by atomic power.

Alexander Markin, a member of the Soviet Academy of Sciences, said over Moscow radio this would transform the frozen northern parts of Asia, North America and Europe into habitable areas with a temperate climate.

Markin didn't mention the floods it might cause along more southerly coasts by melting the Polar ice cap.

The Bering Strait between Alaska and Siberia connects the Arctic and Pacific oceans. It is 55 miles wide.

Markin said Soviet engineers visualize damming it and then using hundreds of giant pumps powered by an atomic power station of 2,000,000 kilowatt capacity to pump Pacific water into the Polar sea.

"This would produce an artificial warm current approximately equal in volume to that of the Gulf Stream," Markin said.

"Each year this current would carry as much warmth into the Arctic Ocean as is contained in 10,000,000 tons of oil. Of course that would greatly moderate the climate in the Arctic zone and adjacent continents.

"Furthermore, by smashing the famous Siberian anticyclone and eliminating conditions that form great masses of cold Arctic air, we would deliver not only Asia and North America but also part of Europe from the frigid breath of the Arctic."

The result, Markin said, would "be something like discovering new continents with a mild European climate and with wonderful natural resources. What is now barren and frozen wilderness would blossom."

Steaks, corsets cheaper then

HALIFAX. — There may have been fewer luxuries 60 years ago, but prices certainly were cheaper. An old accounts book dating back to 1894, just turned up here, offers a variety of choice meat cuts ranging from five cents a pound for stewing beef to nine cents for steak.

If a shopper was looking for a few niceties for dinner, there were strawberries at six cents a quart, cheese for 12 cents a pound and lemons two for a nickel.

There was many a bargain day in the stores of yesteryear, too. Normally, a pair of girl's boots sold for \$1 but pick the right place and you could get boots and rubbers for \$1.25.

Even corsets were cheaper. They went for 75 cents.

DANGEROUS SHELVES

The basement stairs often become temporary shelves for articles on steps or stairs. Every flight, especially those to the basement, should be well lighted.

CHURCHILL PORTRAIT FOR DUTCH PARLIAMENT—This portrait of Sir Winston Churchill, by Dutch artist Max Nauta, will be hung in the Parliament of the Netherlands. The painting of the former British Prime Minister will be the first portrait of a foreign statesman ever to be hung there. The painting was done at Sir Winston's country home at Chartwell, England.

Canadians buy racing stock from British

Backed by the booming Canadian dollar, racing men from Toronto and Calgary are moving in on the British blood-stock market with bankrolls bared, a Canadian Press story from London reports.

Latest to join the ranks of Canadian purchasers is stockbroker Charles Burns of Toronto, who paid 680 guineas for Mend-a-Tear, two-year-old winner of the first race at Brighton. Mend-a-Tear is a bay filly by Brunel out of Torn Pinafore.

Burns said the filly will probably be shipped to Canada. He and Max Bell of Calgary, whose British purchases have included such successful horses as Royal Serenade and St. Vincent, will attend bloodstock sales at Newmarket. Mrs. Burns said it is "highly probable" her husband will make some purchases there.

Meanwhile, a mystery developed—what Canadian owner bought the Irish horse Closed Shop? Sporting Life, one of Britain's leading racing papers, reports that the two-year-old gelding, winner of a big race at the Curragh this month, has been sold to go to Canada. Canadian racing men here said they hadn't heard of the sale. Closed Shop is by Drawbridge out of Lady Barter.

Canadian money is making an increasing impact at British sales. Our country is expanding fast and creating a lot of wealth, Burns said in an interview. I think Canadian owners will be paying increasing attention to British bloodstock.

A mountain blew up in Iceland years ago and a new community was born in Manitoba

Many years ago in Iceland a mountain blew up and the people fled. For most their flight brought them to Manitoba. Nearly penniless, their belongings packed in one or two battered trunks, many of the Icelanders chose pine-covered Hecla Island, Manitoba, lying off the west shore of Lake Winnipeg to start a new life. They named the island Hecla after the volcano that drove them from their homeland, writes Walter Gray of Canadian Press.

Civilization came to Hecla in 1876. Today, the second and third generations still carry on the traditions and the way of life of their forefathers.

Fishing families

Hecla islanders make their living from the lake. Most of the 300 residents come from fishing families.

In June and July the Icelanders stow their gear on their boats and sail 200 miles north to whitefish waters. In September and October they fish closer to home. Following freeze-up they are out over the ice around the island until the breakup in March.

During the summer the islanders fish much the same way as their grandfathers did. But the bombardier has revolutionized winter fishing.

Where previously the fishermen loaded their equipment on dog-drawn sleds and camped on the windswept ice for days, now they skim over the lake in high-powered snow vehicles for a day's fishing and then return home each night.

Only in recent years has island living been made easier for its residents. The first settlers had a life of misery. Thirty unmarked graves stand as a memorial to the

smallpox epidemic that all but wiped out the pioneers soon after their arrival.

Helgi Jones — Johnsson is the family's Icelandic name—says the pioneers had "terrific pride."

"All during the depression, even

Bright colors safety factor

MADISON, Wis.—Bright colors can be a safety factor, as well as a way to brighten children's back-to-school wardrobes, according to a clothing expert at the University of Wisconsin.

Hazel Paschall said red, Kelly green, yellow, and royal blue are easy for motorists to see, particularly in storms and early dusk. Scarves, mittens, and hats in gay colors can make youngsters stand out even if dark colors are used in coats and snow suits.

Miss Paschall added that light and bright colors are no longer a cleaning problem, with washable, quick-drying synthetic fabrics on the market.

Orlon, acrilan, dynel, and nylon are found in both outer and inner garments these days. Coats, jackets and trousers in synthetics are less bulky than wool and just as warm.

Amorous Frenchmen woo grandma

BRIGHTON, England. — Eleven amorous Frenchmen are in for a big surprise.

They have been looking forward to meeting a beautiful "Miss" Alice Rolf, an Englishwoman whose message they had read. The message, asking "a pleasant young man" to write to her, was found in a bottle on the French coast and published in a French newspaper.

The lady in question told the story recently. She is 54 years old, mother of seven children and has nine grandchildren.

Her son-in-law, basking on the beach of this Channel resort last month, scribbled off the message as a joke and put it in a bottle without telling her.

Mrs. Rolf shook her head sadly: "My husband is delighted but I cannot help feeling sorry for the French boys" she said. "We shall have to find some young girls to write to them."

"It's the first fan mail I've ever had."

The bottle was washed ashore at Hemmes de Marck, near Calais, and the story was carried in the newspaper Voix du Nord.

One 17-year-old French youth sent his photograph adding: "I hope you consider me a beautiful boy and that you are a pretty girl."

A 20-year-old student signed off his letter: "Bye bye Alice and kiss kiss very very."

Nourishing Milk Adds to Stuffed Peppers' Zestful Appeal

BY DOROTHY MADDOX

STUFFED green peppers are always welcome eating and a wonderful way to make leftovers taste particularly good.

The meat mixture-stuffing in this recipe is enriched with a half cup of instant nonfat dry milk, and the peppers are served with a low-cost sauce also using instant nonfat dry milk. That means lots of extra nutrition.

A one-pound foil-lined package will yield 5 quarts of dairy-sweet nonfat milk at a moderate price. It is also available in handy, pre-measured packages containing 3 foil-lined envelopes, each of which will make one quart of nonfat milk.

Stuffed Peppers Supreme (Makes 6 servings)

Six medium-size green peppers, 1 pound ground beef, 1 cup cooked rice (½ cup, uncooked); ½ cup instant nonfat dry milk, 1 (½ pound) package process sharp Cheddar cheese, shredded; 2 teaspoons salt, few drops tabasco sauce.

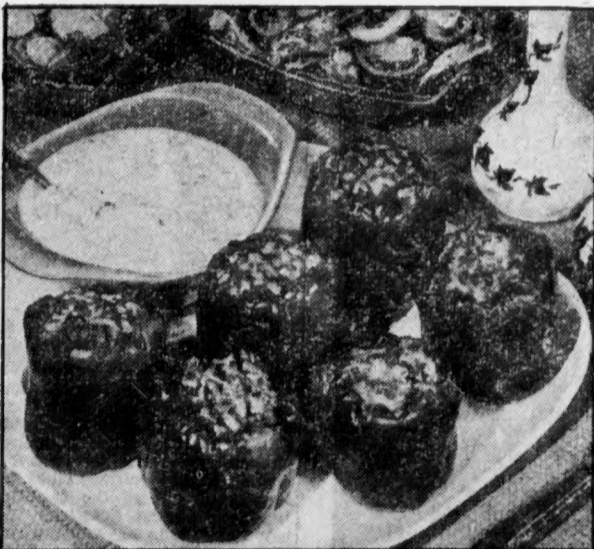

Wash peppers. Cut off stems and remove seeds. With sharp knife, cut a scalloped edge around each pepper. Cook peppers in boiling water, about 3 minutes. Remove from water; drain thoroughly. Combine beef, rice, instant nonfat dry milk powder, shredded cheese, salt and tabasco sauce; blend well. Spoon meat mixture lightly into peppers.

Place peppers in shallow baking dish. Bake in moderate oven (375 degrees F.) until peppers are tender when pierced with a fork—about 35 to 40 minutes.

Onion Parsley Sauce (Makes about 1½ cups)

One and one-half cups water, ½ cup instant nonfat dry milk, 3 tablespoons flour, 1 teaspoon salt, 1 teaspoon worcestershire sauce, 1 onion, grated (about 2 tablespoons); 2 tablespoons chopped parsley.

Four water into top of double boiler. Sprinkle instant nonfat dry milk powder, flour and salt over surface of water. Beat with rotary

Extra nutrition is packed into these flavorful stuffed peppers with addition of nonfat dry milk to the meat-base filling.

beater until just blended. Stir in worcestershire sauce, onion and parsley. Cook over boiling water, stirring constantly until slightly thickened.

beat on track. Few vacationers have discovered Hecla. The road into the area, 100 miles north of Winnipeg, would frighten the best of drivers should he attempt it during a rainstorm. But in good weather he is rewarded by white sand beaches and some of the best lake swimming in Manitoba.

Across the channel are the picturesque islands — Black, Little Punk, Big Punk and Deer—all still in their virgin state.

Deer and moose roam the Hecla woods and on the west side of the island is a marsh that natives say is alive each fall with migrating waterfowl.

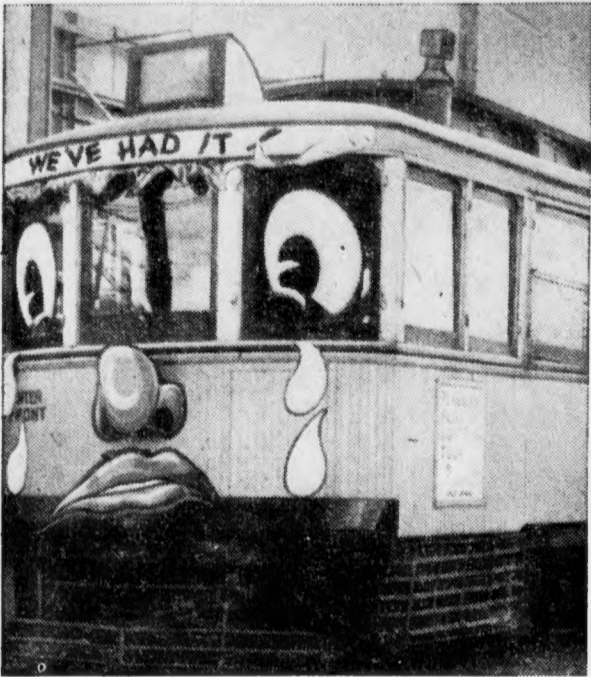

The island's real asset is its people. The Icelanders' door—and their food lockers — are always open to the visitor.

"Icelanders make the best coffee, the best fish and the best vinirterta," says Helgi.

Vinirterta — wine tart — is the Icelandic cook's specialty. It consists of five thin layers of cake separated by ribbons of fruit paste. A dessert fancier's delight.

The United States owns 30 percent of the world's rail mileage, one-third of the highways and nearly eight out of every 10 motor vehicles.

World Happenings In Pictures

THE ONLY TEARS shed in Winnipeg when the last street car rattled down Portage avenue, were those on the tram itself, making its last trip. It ended a transportation era for Greater Winnipeg, which spanned a 73-year period. Winnipeg was the last city in Western Canada to switch to all-bus service.

HANG YOUR SHIRT ON A KAPOK LIMB—That's what Ecuador's Ministry of Economics would have you do, as it announces that it is making large tracts of land available to those who would cultivate the living "general store," hitherto harvested only from wild growth. Bark is used in manufacture of twine, sacks, nets, hammocks and cloth. Hairlike fruit fibre, lighter than cotton, is used for stuffing floats, life preservers, cushions. Seed fibre, very elastic, far exceeds cork in floatation qualities and is used in lifesaving devices, clothing and upholstery. Seed also yields oil for soap making and feed cake for livestock. The Kapok tree is said to be both rain and drought resistant.

IN GOODS HANDS—Football's grand old man, Amos Alonzo Stagg, puts his 93 years of wisdom at the disposal of Billy Parton, 8, whose dad is a back for the Mustangs of California's Stockton College. Stagg, who has been coaching for 66 consecutive years, is advisory coach for the Mustangs.

Fowl play at dinner

Any parakeet birdbrained enough to try to teach a cat how to drink milk is working overtime for nomination as a between-meals snack. To date, both pets of the Joseph Chapman family, of San Mateo, Calif., show up together at mealtime. But someday supper will be late . . .

It's Easy---

Here's How---

See?---

HERE'S HOW—Dress uniforms for ceremonials such as the Changing of the Guard at Buckingham Palace feature those 20-inch-tall shakos, not worn as part of a British service uniform since 1880. Nearly as old as the traditional headgear is the question: "How can the guards see while wearing those things?" Maj. Alistair Ritchie of the Queen's Own Scots Guards, now making a United States-Canadian tour, reveals the secret. There's plenty of vision between combed out hairs which fall across the eyes.

LION DINES IN STYLE—Blondie, social lion of Graham, Tex., enjoys her four large, raw steaks as guest of honor at a breakfast before her departure for New York. Charles Hipp, Blondie's owner is taking the pet lion to Manhattan for an appearance on a TV network program.

MAKING-UP'S A BREEZE—It is, if you have a handbag such as this one, recently shown in Offenbach, Germany. Tiny dry battery concealed in the brocade-covered, feedbag-type leather accessory powers a compact-size fan concealed under the lid.

TOP CHALLENGERS—Floyd Patterson, left and Nino Valdes, are seen by the experts as best bets to challenge Rocky Marciano for his world heavyweight crown.

THESE TWO NEW stamps commemorate two of Canada's Conservative Prime Ministers.

The Sports Clinic

(An official department of Sports College)
Conducted by Lloyd "Ace" Percival

Are you a "natural" athlete?

Chances are you have heard either yourself or some other sports star referred to as "a natural athlete". Chances are you've believed it, too.

But any psychologist will tell you that a person isn't born with skills of any type. A baby doesn't know how to skate or throw a pass. The individual acquires these skills through practice of the right kind. People are born only with physical and mental powers or talents that can be well adapted to certain activities—it's a matter of finding the activity and the special part of that activity for which nature has suited them.

For example, a person may be born with a type of body that is ideal for swimming. Another may be born with a type that is adapted to running a mile. The problem arises when the person with the swimmer's body tries to run a mile, and the miler tries to play football.

No matter whether you are playing the game for competitive fame or just for the fun of it, your best plan is to test yourself carefully to find out the game and the part of that game for which you are best suited. In a sense, everyone is born "a natural athlete". The great athlete is made when he selects the game for which he is suited and then uses all the other secrets of success—proper practise, attitude, etc.

What to do about "stitches"

Every athlete has probably been bothered at some time or another by a "stitch", particularly if they

are taking part in an endurance event.

Many medical experts claim that the most logical cause of a stitch is the formation of intestinal gas. Most of them will go away if you continue what you are doing. But sometimes a stitch becomes very severe, getting more and more painful until you can't stand it.

When this happens, the best thing to do is stop and raise the arm on the side on which you have the stitch. Really stretch it upward. Rubbing and massaging and bending at the waist also helps.

Here's the important thing to remember. A stitch in the side is not serious—it may hurt but it won't injure you in any way if you keep going as hard as you can. So, remember this the next time you feel like quitting or easing up because of a stitch—you can work through it, if you really want to.

Strictly Fresh

City fathers of Bellaire, Minn., have put the community jail up for sale, stating that "it might make a good zoo." Local shady characters apparently think otherwise, as there's been no monkeying around to necessitate maintaining a pokey.

Pranksters in Huy, Belgium, switched road route signs, causing majority of a group of road-racing fans to wind up in one-way streets and muddy fields. Local traffic experts, take note.

Adela Rogers St. John was up at Helmet, Calif., at a time the whole area was parched. Citizens decided to hold a monster meeting and pray for rain. After a half-hour of earnest supplication, the preacher told everybody to go home and await results—everybody, that is, except one young gentleman about 11 years old.

"Why," the preacher was asked, "are you asking that boy to stay with you and continue praying?" "Because," observed the preacher, "he's the only one who had the foresight to bring an umbrella!" And 15 minutes later, didn't it rain!

U.K. comics too violent too

LONDON.—An investigation panel set up to study British comics has reported that most comics are too violent with too many pictures of men knocking each other silly.

The panel, composed of teachers, ministers, a psychologist and justice of the peace, said "far too many stories depend on violence for its own sake instead of letting violence play apart in the achievement of some worthwhile aim."

The panel was set up after a recent outcry in Britain against American "horror comics". As a result, offending comics were banned by an act of Parliament.

DRIVE WITH CARE!

Quick Canadian Quiz

1. What province recently moved into 2nd rank in value of mineral production?
2. Of the annual total of immigrants to Canada what percentage are women and children?
3. In 1954 did Canadian steel production increase or decrease from the previous year?
4. Currently which has the greater value, Canada's imports or Canada's exports?
5. In 1945 the federal civil service payroll was \$15 million a month. What is today's monthly payroll?

Here's the Answer

- 28 French river
- 44 Heavenly body
- 45 Beast
- 46 Measure of area
- 47 Conduce
- 48 Royal Italian family name
- 51 Fruit drink
- 54 Article
- 56 Symbol for magnesium

WEEKLY BIBLE COMMENT

REACHING OUT 73 HALLMARK OF CHRISTIANITY

"Outreach" is a good word for the Christian church. It began by reaching out, and missionary enthusiasm and activity have been its deepest characteristics through the ages.

Jesus reached out for His first disciples. He did not take those nearest at hand, or those among the officially religious, to whom a religious leader might naturally have appealed. He reached out into the common life, and took fishermen and others of lowly, but very active, occupations to be of the inner circle.

He wanted workers—those who would be fishers of men—reaching out and gathering others into the Christian way.

Even if the disciples had not been ready and willing to obey the Master's command to go into all the world and preach the Gospel to every creature, events gave them little choice. The persecution that broke out scattered them, but they had learned well the Master's lesson, and everywhere they went they proclaimed the truth and won disciples.

The world needs as never before the saving, healing, purging power of Christianity and the church; and the church, if it will, can meet that need as never before. The church—that is, the people in it—must, in these days, manifest in new and powerful ways the "outreach" in which the church began.

ANSWERS TO QUICK QUIZ

5. More than \$30 million a month. 3. Steel production decreased by more than one-fifth. 1. Alberta, 2nd to Ontario. 4. For the past two years other nations have sold to us more than they have bought from us. 2. Nearly two-thirds of all immigrants are women and children.

(Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

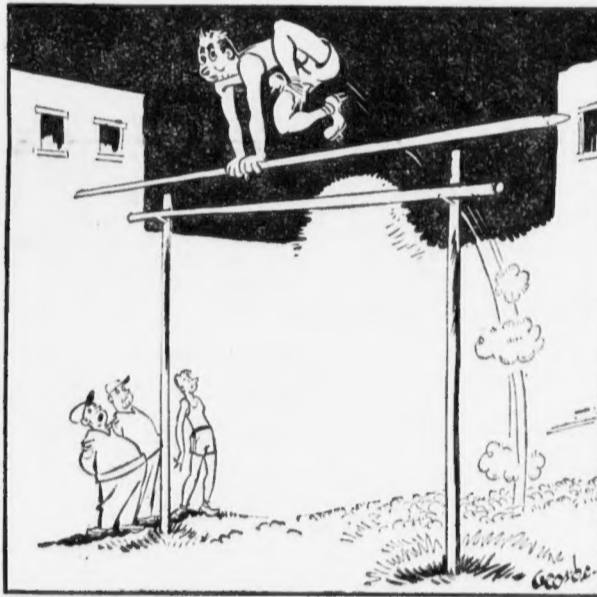

DECODED INTELLIGRAM

1—October. 2—Strongest. 3—Has. 4—Argentina. 5—Rebellion. 6—Opal. 7—Was. 8—All Saints'. 9—Harvey Ward. 10—Football's.

The Holy Grail and its quest formed the basis for Tennyson's Arthurian legends and Wagner's drama, "Parsifal". 2163

Red China desperate for coveted dollars floods foreign markets with foodstuffs

By F. K. WU
Correspondent for CPC

HONG KONG—In desperate efforts to obtain foreign exchange to sustain its program of war preparations, Communist China is shipping considerable foodstuffs and other goods to Hong Kong for local consumption and re-export.

It is estimated in commercial circles that the Peiping regime collects every month through the Bank of China here about \$2,500,000 for the sale of Chinese produce. The goods dumped here consist of livestock, poultry, eggs, fish, fruits, vegetables, canned food, electrical goods, industrial chemicals and paper.

All prices are marked down in order to compete with goods from elsewhere. As a result the cost of living is lower than that of Tokyo, Manila, Singapore and elsewhere in the Far East, although this is not intended in the dumping policy of the Chinese Communists.

Eggs are as cheap as 25 cents a dozen and beef steak is not more than 60 cents a pound. Vegetables are priced at four cents a pound. Canned food is generally 30 percent cheaper in prices than those imported from the United States and Australia.

At one time there was fear here that Communist China would not ship foodstuffs to Hong Kong, which depends on food supplies from the outside. Now they are coming in large quantities just for the purpose of realizing the Hong Kong dollar which can be converted into American currency at about 17 cents.

The South China Morning Post reflecting the opinion of the British merchant class has been urging more trade with Communist China in order to prop up the sagging economy here. Then the Communist trade authorities oblige by letting open the flood-gates of exports, submerging and even wiping out local agricultural produce and light industries.

Many cattle breeders and farmers in the New Territories, the rural sections of Hong Kong, are ruined by the heavy import of pigs, cows, chickens, ducks and vegetables from Kwangtung province in South China. Local factories turning out towels, bed sheets and cotton goods are forced to shut down owing to the presence of similar products from Shanghai at much lower prices.

Thousands of farmers and factory workers in Hong Kong have been thrown out of work since the beginning of summer, while the worst is yet to come. Factories in Canton are turning out electric torches and enamelwares in large quantities and will soon be in a position to compete successfully with Hong Kong products.

It is obvious that the cry for more trade with Red China has turned out to be a boomerang.

While the people in mainland China are eating tree leaves and roots in lieu of rice, this staple food is exported to Hong Kong

Eggs from China sell for 25 cents a dozen in Hong Kong

and elsewhere at prices lower than those in Thailand. Chinese in Hong Kong prefer rice grown around the Canton delta as it tastes better than that imported from Bangkok. Communist China is scraping the barrel bottoms for all available rice for export despite a growing famine throughout the country.

Red China also has been successful in competing with Canada and Norway in the sale of newsprint in the local markets. Chinese products are cheaper by about 10 percent and that is a big difference in the long run.

Because of its lower prices, even some of the bitterly anti-Communist vernacular newspapers are using Chinese newsprint manufactured in Canton and Kirin in Manchuria. There is not much choice for newspaper publishers in view of the present depression brought about by the sharp decrease in Communist purchasers through this port.

A paper merchant said that Chinese newsprint is of such superb quality he believed it was manufactured not in China proper but imported from Western Europe and satellite countries on a barter arrangement.

Chinese native goods for barter are simply levied from the farmers and other producers as taxes, and at most they are requisitioned at very favorable prices for the Communist authorities, the merchant expained.

Government agencies in Canton now allow lower prices for goods consigned to Hong Kong than elsewhere, so that merchants here may

re-export them at a small profit. This concession is made in favor of Hong Kong exporters who may be asked to raise emergency loans to the Communist trading corporations, which need cash to pay for motor fuel, metals and other strategic goods.

Such goods are imported into Communist China through Lufanshi or Garbage End, a small island on the estuary of the Canton river about 35 miles northwest of Hong Kong, and at Snake Mouth, a small coastal town in Pao An county about 25 miles northwest of this city. Other shipments are consigned to Whampoa near Canton, Foochow, Shanghai and Tientsin.

Nowadays big orders rarely come through Hong Kong, which used to enjoy prosperity through entrepot trade. Therefore, this British crown colony is in the midst of trade recession. The United Nations embargo on exports to Red China has little effect here, since the Peiping regime is committed to buy good direct from Europe and elsewhere and to bypass Hong Kong.

Three-country survey
North Pacific Ocean

With samples of sea water taken between Nanaimo, B.C., and the Aleutian Islands, seven Nanaimo scientists have returned from a 7,160-mile ocean voyage reports Canadian Press.

They are part of groups making a three-country survey of the North Pacific Ocean to determine its potentialities with regard to fisheries.

From the water samples scientists will ascertain the salt, phosphate and oxygen content and the temperature. Samples of plankton were also gathered.

The data must be completed by February, 1956, when a date will be set for a meeting with the United States and Japanese scientists.

Six ships from the United States Oceanographic institutions are covering the remaining area from 20 degrees latitude to the Nanaimo group's boundary, and from Japan outward.

Oil seeds used
edible purposes
for 5,000 years

Oil seeds have been used for edible purposes since the time of the Swiss Lake Dwellers, approximately 5,000 years ago. Dr. A. E. Hannah, of the Canada department of Agriculture Cereal Breeding Laboratory, Winnipeg, Man., reports that research programs on oil seed crops, primarily on flax and safflower, are currently under way.

In addition to breeding programs, the Winnipeg Laboratory is introducing and testing other potential oil seed crops that may have a place in Western Canadian agriculture. Breeding programs will be initiated on the most promising species.

Linseed flax is well adapted to the growing conditions in Western Canada. To date, however, linseed oil has not been used extensively for edible purposes due to its composition. Consequently other oil seed species are being evaluated for the edible oil trade.

Safflower is not grown on a commercial scale in Western Canada yet. The main limiting factors in the economic production of this crop are susceptibility to several diseases and the lateness of maturity.

The safflower improvement project at the Winnipeg Laboratory was started in 1953. Good progress has been made in selecting for early maturity and disease resistance in varieties introduced from other countries. A well organized program should combine disease resistance and other desirable characteristics into one variety.

The safflower has certain advantages from the producer's point of view. It can be handled readily with the machinery used for cereal crop production, and due to its resistance to lodging and shattering, safflower can be straight combined without loss of seed yield.

TRY AND STOP ME!
By BENNETT CERR

A big Hollywood producer was boasting about a new assistant he had picked among his remote relatives. "It's positively refreshing," he asserted, "to meet a fellow as young as this who never hesitates to speak his mind. Just yesterday, for instance, I asked his frank opinion of a couple of new ideas he had, and he put it right on the line. He said they were great!"

At the club luncheon, the v.p. remarked, "I hear Billingsworth is in the hospital."

"Impossible," declared a fellow member. "I saw Billingsworth at a bar with a ravishing little blonde only last night."

"Yeah," agreed the v.p. "So did his wife!"

The salesman for the 44 volume encyclopedia climaxed his pitch with a hearty, "Yes, ma'am! You simply put a tiny deposit down and don't pay another penny for six months!" The prospect looked surprised and demanded, "Who told you about us?"

Bookmaker, in London, England, has learned never to bet on a filly. Winked at a pretty girl who promised him a date and kept it by haling him into court for illegal bookmaking. She was a police-woman.

Plan village for old age pensioners

A village planned for old age pensioners in Surrey municipality, near New Westminster, B.C., is on the drawing board, says a Canadian Press report.

The \$1,000,000 venture is being developed by non-profit-making Pioneer Village Homes Limited. It is to be located on a 40-acre site east of the Vancouver-Seattle King George highway.

Ralph Coles, provincial president of the old age pensioners and vice-president of the sponsoring group said arrangements to finance the project are now being worked out through the National Housing Act.

"We hope to raise \$900,000 by a bond issue and obtain \$100,000 from the NHA," he said. Bonds will be of \$1,000 denomination bearing five percent interest.

"We are confident that we can raise our share of the money and the NHA has agreed to the development in principle. However, this is something unique in government housing and final details still have to be worked out."

Mr. Coles said the group hopes to start with 102 double units and 70 single.

Each home will be built of poured concrete, wired for electric heating and cooking and will contain everything to make living conditions as humane as possible.

Rent of each unit will be fixed by NHA, probably 25 percent of the occupant's income. A community hall, store which would handle drugs and other commodities at almost wholesale prices and a central automatic laundry are also planned.

Two pairs missed this simple slam in the world individual championship at Monte Carlo. In one case South, having agreed to play the Two Clubs, opened with One Diamond only.

Over North's One Heart, he bid a non-forcing Three Diamonds, another dangerous underbid. North then bid Three Spades, South Four Clubs, North Four Hearts and South Four No-Trumps; North, bewildered, elected to pass.

Another South player was at fault in this sequence: Two Diamonds—Two Hearts; Three Diamonds—Three Spades; Four No-Trumps—Five Clubs; Diamonds—pass. He complained that North had failed to rebid his Hearts, although he had done so by inference with his bid of Three Spades.

At other tables the bidding started along Standard Bridge lines with Two Diamonds—Two Hearts—Three Hearts. North being thus reassured against a possible misfit.

Be a courteous driver!

THE QUESTION—"Prisoner," right, stands in the eye-searing glare of floodlights as "the enemy" questions him in interrogation room at Stead Air Force Base, Nevada, where the Air Force conducts an antibrainwashing school. Stripes on wall form one portion of painted effects designed to prove psychologically unnerving to men being questioned. Some 29,000 volunteers have been processed through the controversial 17-day course, which the Air Force says is designed to teach airmen what to do and how to survive in case of capture.

Manitoba co-ordinates rehabilitation

A new provincial program which will co-ordinate and expand all skills and services required for the rehabilitation of disabled persons has been launched in Manitoba.

The program has been designed to assist handicapped civilians to earn their living and to assume normal social relationships as far as they are capable.

Hon. R. W. Bend, minister of Health and Public Welfare, paid tribute to the many voluntary agencies that have been providing rehabilitation services to meet specific needs in years past. He pointed out, however, that some disabled persons are unable to qualify under any of the existing services.

To co-ordinate the efforts of all these agencies and to fill in gaps in the over-all program, the minister stated, the Society of Crippled Children has been appointed Central Rehabilitation Agency for the Province of Manitoba.

The appointment was recommended by the Rehabilitation Commission established several months ago to study the services offered the disabled in Manitoba. The Society for Crippled Children, it was noted, has been providing excellent rehabilitation services to crippled children and to persons of all ages disabled by polio.

The new agency is responsible for providing a comprehensive medical, social and vocational assessment of all disabled persons referred to it by the Provincial Co-ordinator of Rehabilitation. It will also provide services which a disabled child or adult may require to achieve total rehabilitation.

The provincial program will be assisted by three financial grants from the Federal Government.

First of these will be a contribution of fifty percent of the cost of maintaining a provincial co-ordinator responsible for organizing and supervising the various programs in the province.

Another \$70,000 will be provided for expanding present medical services and for adding new services to assist disabled persons not included in any existing facilities.

Under the Canadian Vocational Training Agreement, formalized vocational training or on-the-job training will be provided for disabled persons.

While these grants provide the tools with which the job of rehabilitation can be done, Mr. Bend stated, its effectiveness "will depend entirely upon the close co-operation between the voluntary agencies, medical profession, hospitals, schools and employment services."

Top award to CBC program

OTTAWA. — The Canadian Broadcasting Corporation program "Birds of the Forest" has received the Italian Press Association prize for documentary radio programs, Charles Jennings, director of programs, has announced.

The award is one of the top international prizes for radio excellence. It is awarded annually to a radio organization that participates in the Italian international competition.

The program is a presentation of bird songs recorded by Dr. William Cum of the Federation of Ontario Naturalists. It is written, narrated and produced by Thom Benson of the CBC.

It has been broadcast twice on the British Broadcasting Corporation network, on the Italian and Swiss radio networks and in the United States as well as on the CBC network.

Have herd of 300 sea horses now

Rabbits have nothing on sea-horses, according to Don and Frances Basnight of New Bern, N.C., as reported by United Press.

The Basnights said they accidentally scooped up a male sea-horse in getting a supply of sea water for their aquarium and since they put him in their tank he has become a father.

Eggs a female sea-horse had deposited in a pouch of the male sea-horse hatched and the Basnights now have a herd of 300 sea-horses.

All prunes are dried plums.

OUR COMPLETE SHORT STORY—

THE DIAMOND

By KURT VON FISCHER

ON THE "Nieuwe Kade" in Amsterdam, the quay where the big liners serving passenger traffic to London are moored, stood a man with a cigar between his lips. Though seemingly calm, leaning on the balustrade and contemplating the green waves washing over the granite squares of the wall, he viewed with furtive excitement a policeman, who stood motionless, legs apart, some 10 yards away.

The man with the cigar casually turned his back towards the uniformed figure. He was of small, lean stature, with an olive complexion and thin, black moustache. Nobody would have suspected him to be the well-known diamond grinder Willem Verhaert, popular society figure of the town, whose mysterious disappearance half a year ago had busily engaged the attention of police headquarters of many a European capital.

Suddenly the man threw his half-finished cigar into the water. Then he took out another one from his pocket and lighted it. He deeply inhaled the smoke, puffing it out nervously.

Had the policeman grown suspicious? Was everything to go wrong at the very last moment, the plan of one year to be nullified? Carefully, he took the Havana from his mouth and hid it between his quivering palms. Could the policeman suspect that, hidden in an artificially cooled capsule in the middle of the bulging tobacco leaves, there was the missing Vijzel diamond?

For years Verhaert had been one of the most esteemed diamond grinders of Amsterdam's flourishing industry. But though the worth of millions ran through his fingers he had never succeeded in achieving more than a moderate financial position. Now he was nearing the fifties, a bachelor and filled with feverish greediness for the luxuries of life.

And it was then that he determined upon and planned the great coup. A lucky coincidence had delivered the unique chance into his hands. The Vijzel Diamond, newly found in South Africa and the tenth largest in the world, was given to him for grinding.

Soon the papers had a sensation. The well-known grinder Verhaert had disappeared together with the precious stone. While the police blocked and checked all roads and means of transportation, the principal in all this excitement sat in his ingeniously prepared hide-out in a cellar and subjugated his body to a torture.

By hunger, excessive sweating and endless gymnastics he reduced his weight by many pounds during a few weeks. The pudgy Verhaert changed into an emaciated creature. Staining of his skin with permanganate of potash, atropin applied to the eyes, a moustache dyed with henna and a big expanse of bald head in place of the former flaxen mane of hair created the French champagne salesman Emile Verlon, bearer of the forged passport.

Half a year in the dark and then he risked the step across the frontier. Once in London, a new life could begin. During passport inspection everything went well; not even his own mother would have recognized him. The customs control was exceedingly thorough, the officials still searching for the vanished diamond. He was even subjected to a body inspection.

But during the whole procedure he flauntingly chewed his Havana, right under the eyes of the officials.

For two months he had laboriously worked on the manufacture of this cigar. A mere phony would certainly have aroused the suspicion of the officials. But he had succeeded in producing an effect out of real tobacco leaves, which gave quite a natural impression, was perfectly smokable and still covered the diamond in its middle. Finally came the blessed word: Passez! He had succeeded.

And now, when only embarkation remained, now, after he had cleverly overcome all critical situations, now, in the very last moment was everything to come to naught?

What could this damned policeman have noticed about him? Could he have recognized him? Impossible! Or did he, by heavens, suspect the cigar? Not very likely, either. But why was he, now, staring at him?

An icy chill froze his limbs. The policeman was stepping towards him.

"Give me the cigar, will you?" he heard a cold, hard voice say.

Willem Verhaert closed his eyes, his knees shook. He was not the type to resist. He was cunning but not brave. Also after his terrible loss of strength he would have been physically unable to fight.

He fatalistically awaited the clicking of the handcuffs.

But nothing like it happened.

The policeman still stood facing him. He even smiled amiably now. "You know, sir," he said, throwing the cigar carelessly into the sea, "The building over there is the gasoline dump. Smoking is strictly forbidden here!"

How much difference will the **BEST** anti-freeze make to your car?

*** PRESTONE**

Brand Anti-Freeze

will give your car a cleaner, smoother running engine this winter

With "Prestone" Anti-Freeze you get much more than just freeze-up protection. In addition to special chemical inhibitors, "Prestone" Brand Anti-Freeze contains a unique Polar Film inhibitor which forms a thin protective coating in the radiator, engine cooling jacket, hose connections and water pump. This rugged film seals the cooling system against rust, corrosion and deterioration. It prevents loosening of any rust particles present in the cooling system before "Prestone" Anti-Freeze was added. It prevents rust from floating around to clog radiator tubes... which could result in overheating and overflow loss.

This extra protection means a clean, properly working cooling system all winter... lets your engine run freely at more efficient temperatures and with less wear.

*** PRESTONE**

Brand Anti-Freeze

will give your car a cooler, smoother running engine next summer

You'll get the full benefit of "Prestone" Anti-Freeze protection next summer when the anti-freeze has been drained and replaced with water and rust inhibitor. During winter the cooling system has had maximum protection against rusting, corroding, or clogging. It's clean and clear of rust... set to keep your engine cool in hottest weather... give you better gas mileage. Because winter driving has put the least strain on your engine... it's in top shape to give you smooth performance throughout the longest summer runs.

The best anti-freeze makes all the difference in the world to your car... So, insist on "Prestone" Brand. You'll be glad this winter and next summer, too.

Remember... there's only one

"PRESTONE" Brand Anti-Freeze

"Prestone," "Eveready" and "Prime" are registered trade-marks

NATIONAL CARBON COMPANY
DIVISION OF UNION CARBIDE CANADA LIMITED

A word of CAUTION

No matter what anybody tells you—there's only one "Prestone" Brand Anti-Freeze. There's no other anti-freeze like it. Insist on "Prestone" Brand... and you can get it... anywhere!

You can't go ALL-OUT

If you feel ALL-IN

These days most people work under pressure, worry more, sleep less. This strain on body and brain makes physical fitness easier to lose—harder to regain. Today's tense living, lowered resistance, overwork, worry—any of these may affect normal kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest, that "tired-out" heavy-headed feeling often follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Ask for Dodd's Kidney Pills at any drug counter.

Level Land

Many of this district are taking in the evening evangelistic services of Chalmer-Friesen being held in the Elks Hall at Drumheller.

Henry Lippert was a weekend visitor in the S.D.A. Church on Oct. 12.

Mrs. Charles Garbutt and children of Irricana were visiting with Mr. and Mrs. Emil Lang and the S.D.A. Church on Oct. 15th.

Word was received from Amariyis Gramms of Portland that she enjoys nursing very much and got capped not long ago.

Two carloads of the Gramms relatives were down from Leduc to attend the Mother Gramms funeral.

Visitors at the home of Mr. and Mrs. Theo Bechthold were Mrs. Walter Bechthold and Lann and Mr. and Mrs. Harvey Bechthold, all of Calgary.

Mr. and Mrs. Vernon Kaiser and Leroy Huether of Canadian Union College were visiting with their parents, Mr. and Mrs. Reinhold Huether.

Ben and Reinhold Huether of this district left this week with their combines to help the Mableys at Delacour.

MRS. CHRISTINE GRAMMS
A resident of the Beiseker

district since 1917, Mrs. Christine Gramms died at the home of her daughter, Mrs. E. C. Chandler, Oct. 13, 1955 at the age of 93 after a lengthy illness.

Mrs. Gramms, who was born in Lublin, Poland, June 29, 1862 left with her husband as a young couple for South America, from there to Pennsylvania, then to Michigan and from there to Canada.

She was predeceased by her husband Michael Gramms in April of 1946 and a daughter Mrs. Lydia Schulz in 1950.

She is survived by two daughters, Mrs. Helen Chandler of Beiseker and Mrs. Ella Kaiser of Red Deer; three sons, Gust. Gramms of Detroit, Mich., and Emil and Dan Gramms of Beiseker; also 10 grandchildren and nine great grandchildren.

Mrs. Gramms was a member of the S.D.A. Church of the Level Land district.

Mrs. Gramms spent the last 15 years mostly in bed. For some time with Mr. and Mrs. Emil Gramms, with her daughter Mr. and Mrs. John Kaiser, and for some time at a nursing home in Calgary, and the last few years of her life were spent with her daughter Mrs. Earl Chandler Sr.

The funeral took place in the S.D.A. Church with Pastor Goertzen officiating, assisted by C. C. Voth of Calgary and Gery Friesen. The music was supplied by a duet, Mrs. Sam Leis-

ke and Mr. Jake Gimbel, and the quartette, Jacob and Courtney Gimbel, Marvin Dick and James Suelzle.

Burial took place at the S.D.A. cemetery with Gooder Bros. Funeral Home in charge.

Miss Alma Hixt showed pictures and slides in the S.D.A. church Oct. 8. Miss Hixt is doing wonderful work as a missionary in Africa under the Sudan Interior Mission. She first went over to Nigeria, West Africa in June 1945. She has served in Africa for eight years and this is her second time back on furlough. She will leave again this coming January. She is doing medical work in the Warji tribe numbering about 26,000 pagans. Treats 100 to 200 persons daily besides treating hundreds of persons with leprosy. Also have a mission school supervised by Miss Tillie Goertzen of Calgary. The Hausa language is used and the complete Bible had to be translated into their language.

Nigeria is 10 degrees north of the Equator, is very hot, and consists of jungles, swamps and grassland. There are about 250 different tribes in Nigeria.

The S.D.A. Church took up an offering which amounted to \$50 for her work. Miss Hixt is the daughter of Philip Hixt formerly of Beiseker and the sister of Mrs. Elgar Tetz and Mrs. Roy Berreth.

F.U.A. JUBILEE DAY NOV. 16
The date for the Farm Union's big membership drive, F.U.A. Jubilee Day, has been set for

Wednesday, November 16. Following this announcement the Union anticipates that the final plans for the one day member-

Group Plan B is now available for employees of a common employer, with a staff of 3 to 9 persons. This pre-paid medical plan offers freedom from worry and freedom from financial difficulty. The small subscription per month gives you the Key to Better Health and Better Living. Check a few of the features of this Plan, and send in the coupon below to M.S.I. for the FREE folders giving all particulars.

WHAT IS M.S.I.?

Medical Services (Alberta) Incorporated is a non-profit corporation. It is sponsored by the Medical Profession of Alberta for the purpose of providing pre-paid Medical care to the people of Alberta. As M.S.I. is non-profit there is no capital stock on which dividends are paid, nor are there commissions paid to agents or salesmen. It is independently controlled by an elected Board of Directors, and is the only non-profit organization of its kind in Alberta having the endorsement of the Medical Profession.

MINIMUM ENROLMENT REQUIREMENTS

Employees of a common employer with a minimum staff of three persons and a minimum staff of nine persons all employed full time. 100% of employees must enrol.

HOW DOES THE PLAN WORK?

The Plan will issue an Identification Card which must be presented to your Doctor when requesting service. The Doctor will send his account direct to M.S.I. for payment. NO RED TAPE... NO FORMS TO COMPLETE.

To Wait... May Be "Too Late"
